

NEUROSPARK (NSP)

AI-Powered Web3 Risk Intelligence Infrastructure

Version 2.0 – June 2026

EXECUTIVE SUMMARY

NeuroSpark is an AI-powered Web3 risk intelligence platform designed to help investors identify risks before capital is deployed. The platform analyzes blockchain contracts, liquidity structures, wallet behavior, tokenomics, and market signals to generate actionable risk assessments for digital assets.

THE PROBLEM

The cryptocurrency market continues to suffer from rug pulls, malicious smart contracts, hidden mint functions, liquidity manipulation, wallet concentration risks, insider activity, and fake volume generation.

THE SOLUTION

NeuroSpark introduces an AI-driven intelligence layer that continuously evaluates blockchain assets and generates understandable risk scores.

CORE FEATURES

AI Risk Score, Contract Scanner, Liquidity Intelligence, Wallet Intelligence, and Risk Monitoring.

PRODUCT VISION

NeuroSpark aims to become a complete Web3 risk intelligence ecosystem including dashboards, alerts, analytics and APIs.

TOKENOMICS

Token: NSP | Network: BNB Smart Chain | Total Supply: 500,000,000 NSP | Minting Disabled | Burn Mechanism Enabled.

TOKEN UTILITY

Premium access, AI analytics, API subscriptions, governance participation and community incentives.

SECURITY

Public smart contract verification, on-chain transparency, supply monitoring, burn tracking and community accountability.

ECOSYSTEM

Built around Intelligence, Analytics and Community.

ROADMAP

Foundation → Intelligence Layer → Platform Beta → Ecosystem Expansion → Full Platform.
